

FW Shell DIAL Study Reports for Canisters 4569 1393 1661 attached email (Shell)

Gentlemen;

Attached are the summa canister results for samples collected on L and 15th Street (South of ACU), Olefins Tank Farm in the vicinity of TOL913, and P and 15th Street South of the Hydroprocessing Control Room. Samples were analyzed by CCA. Each Air Toxic Report also includes lab spiked quality assurance samples, blanks and the chain of custody forms. The quality assurance samples are identified with spike numbers or as blanks on each Air Toxic Report.

Please contact me if you have any questions or would like to discuss the results.

Regards,
Barb
